€ COE 2 SEA WELCOME TO COE 2 SEA GMBH!

COE 2 SEA GmbH was conceived back in 2018, when we sought the opportunity to expand the services to our existing client base at COE Shipping, as well as a coincidence that one of our exclusive partners needed a TC, but the market level was too low, so we got the opportunity to show our skills in this field. We have the Ship on Charter ever since. This was our start with a single vessel, our MV COE Laura, which quickly became very active within European waters as well as the west Africa region. Since then, our fleet has developed and grown into diverse direction where we now manage mini-bulkers, multipurpose and coasters, as a direct evolution of our customers' requirements. With this same purpose, we are often in the market seeking for further tonnage up to 45.000 mt dwt to take in under our flag, to further serve our client's needs. On the bigger tonnage, we usual-

ly prefer to do TC Trips or Round voyages. As of 2022, COE 2 SEA has purchased MV COE Kaethe, a 1800 mt dwt coaster, which is trading mainly within North Sea and Baltic Sea waters. Same year we purchased together with two of our good customers MV COE Mina. So, on the Coaster-side of the business we are Ship-Owners in the meantime ourselves. Our long-standing partnerships and long-term cooperation both on the ship-owning as well as on the charterer's side, have enabled us to withhold a spotless worldwide reputation. We conduct our business with utmost care, true sense of responsibility and high ethics, as we believe this is the unquestionable foundation for any sort of cooperation that leads to win-win scenarios. Due to the above, we are honored to have the possibility to work with some of the most well-known companies within the shipping industry.
