---

INNOVATIONS SINCE 1911

---

## ON A GROWTH PATH

For over 110 years, our company has specialized in the innovative presentation of information. It all started in 1911 as a typical sign making business. Today, the Klostermann Group is one of the market-leading providers of illuminated advertising in Germany. We are a medium-sized company with more than 200 well-trained and experienced employees serving customer groups from various industries.

In addition to the production of advertising installations, wayfinding and information systems and steel structures, our diverse portfolio also includes digital signage and e-mobility. From planning and production to installation and maintenance, our customers

in Germany and abroad receive complete solutions from a single source. Together with international cooperation partners, we realize orders throughout Europe. Whether individual single projects or bulk orders: We have the capacity and flexibility to fulfill orders of any format. Our success is based on a team of experienced specialists, modern production processes, a high level of innovation and a clear focus on quality and performance. This is evidenced not least by our ISO 9001, ISO 14001 and SCC\*\* certificates.

*By the way: The protection of the environment is very important to us! We therefore only use electricity from renewable energies. 100% ECOPOWER is our contribution to climate protection.*

---

## THREE PILLARS OF OUR SUCCESS

The Klostermann Group includes three partners whose services complement each other:

**KLOSTERMANN GmbH** – The nucleus of the company is specialized in:

- Sales and consulting
- Screen printing
- Electrical installation
- Commercial project management
- Shipping
- Construction
- Foil technology
- Painting
- Steel/aluminum construction
- Plastics processing

**KLOSTERMANN SERVICE GmbH** cares about:

- Maintenance and repair
- Measurements and surveys
- Technical project management
- Building applications
- Logistics, warehousing
- Assembly and electrotechnical services
- Spare parts management

**KLOSTERMANN NEDERLAND B.V.** – Mainly active in Benelux countries. Main tasks of our electrical engineering and service company are:

- Maintenance and repair
- Technical surveys, measurements
- Project management
- Cleaning
- Electrical installations
- Assemblies
- Sales and distribution
- Other services

*Do you have any questions about our portfolio? Just give us a call. We are there for you.*

## SERVICES FROM KLOSTERMANN

## PROJECT MANAGEMENT

SURVEYS AND  
PREPARING SERVICES

From the first consultation to installation and maintenance, we accompany our customers competently through all phases of their project. At the beginning, there is detailed planning and conception. The basic framework for this is a project-related database solution in which all relevant data is made available – both for internal and external use by the customer. On site, data and measurements are recorded using a tablet and a specially programmed app. On this basis, we then create a visualization as a basis for decision-making

for the customer. The preparation and coordination of the building application with the authorities is then carried out by us. The elements are constructed simultaneously by our experts in the technical department.

*The CAD or inventory data form the basis for the production that now follows. The complete project control and coordination is done in close coordination with the customer.*

## ... FINAL ASSEMBLIES ON SITE

We have a nationwide network of service technicians, our own teams and partner companies, so that we can flexibly and quickly take care of the realization or installation on site. Of course, we also take care of the preparatory measures, such as civil engineering work or painting. Following installation, we are also happy to take care of value retention and maintenance to ensure a lasting positive appearance.

Charging station

## YOUR SPECIALIST FOR CHARGING INFRASTRUCTURE

E-mobility is becoming increasingly relevant in Germany and the EU. To enable widespread use of electric vehicles, a broad network of charging stations must be available. Our company has made a name for itself in this area in recent years. We are familiar with a wide variety of charging systems from well-known manufacturers and have already installed many hundreds of charging stations.

E-MOBILITY

## THAT IS WHAT WE TAKE CARE OF

For our clients we take care of measurements on site, planning, project management, civil engineering and electrotechnical installations. Our service package also includes the planning and construction of complete service station roofs made of steel and glass. We offer our activities in assembly, installation and maintenance throughout Europe as a one-stop service!

## EFFICIENT PRODUCTION

Klostermann is one of Germany's leading manufacturers of illuminated advertising systems and steel structures. In recent years, we have continuously invested in the modernization of our machinery and equipment. We saw, weld, edge, mill, laser, bend and punch CNC-controlled metal, plot and laminate foil and vacuum-form plastic according to the individual wishes and specifications of our customers.

## AN ESTABLISHED TEAM

Currently, more than 200 qualified employees are part of Klostermann Group. With meticulous craftsmanship and creativity, they work to fulfill the wishes of customers. Their work is based on sound training, many years of experience in the industry and a high degree of flexibility. After all, it is particularly important in our industry to break new ground and consistently adapt our own range of services to market requirements.

WHOLESALE AND RETAIL

## EXPERIENCE PAYS OFF

For decades, we have maintained partnerships with global players from various industries, such as the petroleum industry or retail. We accompany our customers with their projects such as long distance signage, new buildings and design changes, rollout their new design in the shortest possible time and much more! Here, our customers benefit from our comprehensive know-how and our network of proven local partners.

## A SOLID PERFORMANCE – STEEL STRUCTURES

Our experience in the field of steel structures comes from various successful projects: Roof structures for malls, car dealerships or gas stations, facade cladding for buildings or steel-glass pavilions for the Deutsche Bahn. We work closely with planners and general contractors and accompany them in the implementation of their construction projects.

Airport wayfinding

## WAYFINDING SYSTEMS

### MODERN WAYFINDING SYSTEMS

Wayfinding systems show passengers the right way at train stations and airports. They are also used in companies, offices, hospitals and sports facilities to provide visitors with the necessary orientation. This also applies to long-distance signs to draw the attention of motorists. In close cooperation with our clients, we develop solutions that visually embed into the existing environment.

Conversion of the company brand from analog/static to digital/dynamic

## DIGITAL SIGNAGE: FLEXIBLE COMMUNICATION

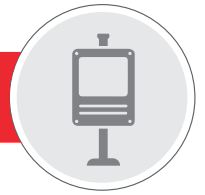

One of the growing lines of business is Digital Signage, the digital evolution of classic illuminated advertising. Digital signage can be used both indoors and outdoors as an innovative solution for flexible communication that is always up to date and attracts maximum

attention from the viewer, e.g. through dynamic logos. Digital signage, also known as Digital Out Of Home, is an impressive way to evoke emotions and convey versatile messages.

DIGITAL SIGNAGE

## THE SUCCESS SPEAKS FOR ITSELF

Klostermann has already implemented innovative digital projects. Whether dynamization of analog advertising elements or nationwide installation of single- or double-sided screens, digitization of public transport timetables or digital shop window advertising: sizes and designs are tailored to the customer's wishes, and the necessary mountings and ventilation management are taken into account. The content can then be uploaded by the customer, and the control and transmission of the data can be flexibly defined. The content can of course also be managed centrally by the customer.
