

# Innovative Recycling Technology Made in Germany

**MPM**  
ENVIRONMENT INTELLIGENCE GMBH

# Our Win-Win-Strategy Your Advantage!

The MPM GmbH evolved out of the Fuba Printed Circuits GmbH by a typical management-buy-out in 2005. As a medium-sized company we regard our responsibility mainly in meeting the raising requirements of permanently changing markets. Speed, flexibility, convincing prices and best quality constitute the cornerstones of our success.

Along with the typical needs of our customers the recycling market is characterized by special challenges: permanently rising legal obligations and the ecologic postulate for a future-oriented, environmentally responsible and sustainable handling of our resources. For this reason MPM follows the long-term objective of a calculable business policy instead of a short-term economic benefit.

The winners are:

- our customers - to whom we guarantee an economic and reliable recycling of their problematic waste!
- our employees - who can rely on safe and responsible jobs!
- our environment - for which we provide an important ecologic contribution!
- our company - in which we reinvest for a future-oriented, professional and intelligent environmental management!

You still have questions? We are happy to inform and consult you!

## Benefit from sustainable Recycling Solutions Our motto: Intelligent Environmental Management!

---

As experienced partner we can offer a widespread power spectrum to your needs. We are recycling experts for:

- Basis material from the primary industry!
- Unassembled PCBs from the PCB-industry!
- Assembled PCBs from EMS and OEM!
- Metalliferous technical dusts!
- Electronic waste 'end of life'!

# Closing the loop Recirculation of Raw Materials into the Economic Cycle!

## Recycling of assembled PCBs

- Gold
- Silver
- Copper
- Aluminum
- Palladium
- Iron
- Epoxy resin

## Recycling of drilling and milling dust

- Copper
- Aluminum
- Epoxy resin

## Recycling of unassembled PCBs

- Copper
- Epoxy resin

## Recycling of PCBs Our service from A to Z!

From the hour of birth of a PCB in the primary industry via the PCB-industry, the EMS- and OEM- industry to the initial treatment facility 'end of life':  
All along this life cycle we offer a physical solution to generate precious metals and plastics out of the electronic waste.

# High-Tech-Recycling of Technical Dust The Success is in the Details!

Metalliferous technical dust is a special challenge for recycling the content of precious metals. Since 2012 we offer a fully automatic and technically mature solution 'state of the art' for our customers. This enables us to regain gold, silver, copper and palladium for the economic cycle.

# Our Expertise Your Excellence!

Benefit from our experience and our consulting tools:

- Analysis of the current state operational and organizational structure
- Generation and integration of ISO 50001 and ISO 14001
- Policy for environmental protection, energy and health & safety
- Manuals for environmental protection, energy and health & safety
- Directives for environmental protection, energy and health & safety

Support and expert monitoring during certification

- Provision of:
- Safety specialists
  - Safety engineers
  - Specialists for fire protection
  - Specialists for environmental management

Quality in Black and White  
Our Certificates!

Special waste management company § 56 KrWG  
Energy management ISO 50001  
Initial treatment facility § 21 ElektroG

- Environmental protection ISO 14001
- Health & Safety management NLF / ILO-OSH 2001
- WEEELABEX
