

ON-TIME SERVICE, PRECISION AND EXPERIENCE –
OUR RELIABILITY ENSURES YOUR SUCCESS

STA
GmbH
SCHIFFSTECHNIK
& ANLAGENBAU

ON TRACK SINCE 2001

STA GmbH was founded in 2001 as the successor company to STN Atlas Elektronik. Since then, our company has earned a reputation as a specialist for switchgear, installation of new constructions, repairs, maintenance and service of all electro-technical and electro-mechanical installations on ships and in industry. Today, our permanent crew comprises around 35 qualified specialists. In addition to experienced, long-serving graduate engineers, electrical technicians, electrical machine builders and master craftsmen, they also include junior specialists, whom we train as electronics technicians for industrial engineering. We possess the bundled know-how to cover all services from design and production to on-site service. Especially in our industry, reliability and

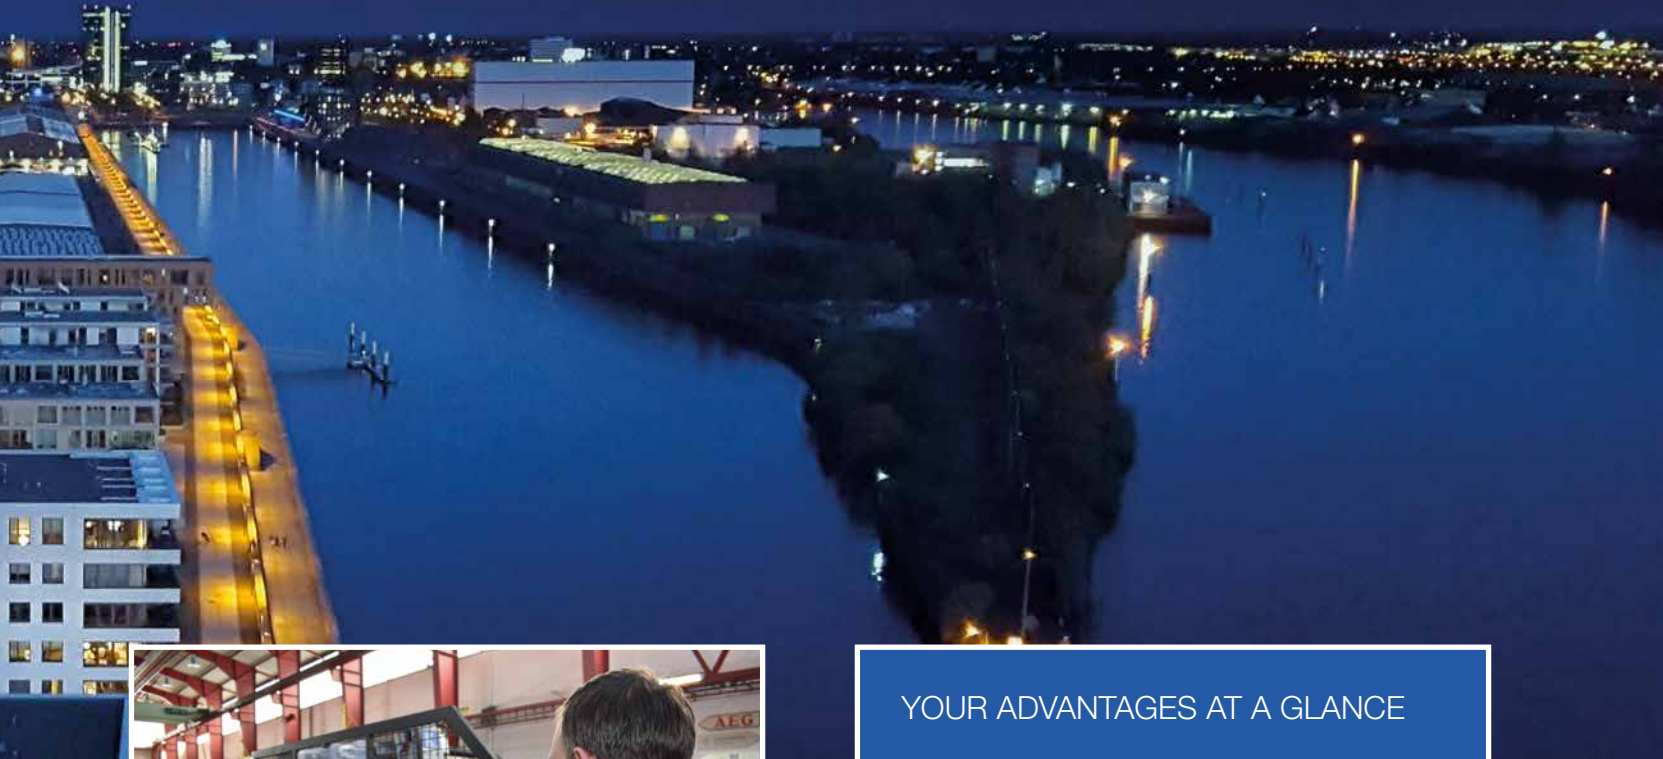

prompt support are crucial. That is why we are there for you around the clock, 7 days a week!

JOINING FORCES TO REACH THE GOAL

Our subsidiary, ASI GmbH, rounds off our portfolio with:

- Alarm and monitoring systems
- Power management systems
- Safety systems for main engines
- Stand-by pump controls
- Navigational watch alarm systems

STATE-OF-THE-ART EQUIPMENT ON BOARD

In addition to an experienced, qualified and regularly trained team of competent specialists, our success also rests on our modern equipment. In our spacious production hall of approx. 1,500 m², we use the latest technology, such as machines for CAD-controlled high-performance housing processing, cable assembly and automatic bending, punching machines, a test bench for switchgear, motors and generators, a test bench for circuit breakers and a spray booth for paint coatings. All this equipment enables us to carry out our customers' projects with the highest precision, flexibility, efficiency and cost-effectiveness. In addition, we naturally also have the latest assembly tools for on-site installation.

YOUR ADVANTAGES AT A GLANCE

- Many years of competence and experience
- High availability
- Great flexibility and rapid responsiveness
- Worldwide deployment through flexible staff and service partners
- High efficiency and cost-effectiveness

Do you have any questions about our versatile portfolio?

Then please do not hesitate to contact us.
We will be happy to advise and inform you!

WE NAVIGATE YOU SAFELY THROUGH ALL PROJECT PHASES

Our wide range of services covers the entire range of requirements of shipping companies and shipyards – because our portfolio is as diverse as your needs!

Our services for you include:

1. Project planning
2. Construction
3. Switchgear construction
(including outsourced production)
4. Installation of new constructions
5. Commissioning
6. Repairs / on-board service
7. Conversions
8. Circuit-breaker inspection and repairs
9. E-motors and generators
10. Spare-parts supply for all on-board
E-technology

THE RIGHT DECISION – FOR SURE

When planning and manufacturing switchgear and consoles for industry and shipping, we pay strict attention to compliance with all relevant regulations and classifications. We design and produce main switchboards, emergency panels, bridge consoles, machine control consoles, motor switchgear, distribution boards and special systems according to your individual requirements.

Our range of services also includes fully automatic cable assembly for switchgear construction. For this purpose, we have invested in several large machines, in order to minimise working and production times.

OUR QUALITY PLEDGE

We do not compromise, when it comes to quality! STA GMBH has been certified according to the stringent requirements of the DIN ISO 9001 quality management standard for many years. Compliance with these high standards is regularly monitored by external experts.

SPECIALIST FOR OFFSHORE PLANTS

We are also your qualified service provider for the support of offshore plants. The experts in our team are certified to comply with the operator regulations in order to carry out operations on many different wind farms

YOUR RELIABLE PARTNER

As a competent and reliable service partner, we guarantee strict adherence to deadlines and top-quality workmanship. Whether manufacturing, commissioning, major or minor conversions of switchgear, testing of circuit breakers with our own breaker test bench (up to 12,500A) or repairs: Our specialists handle these tasks competently for our internationally operating customers – worldwide or at our premises in Bremerhaven.

Here, we have our own pier, where ships up to Panamax size can dock.

We specialise in detecting and repairing faulty components and defective mechanics in the power distribution systems, using thermography. Another pillar of our service is the cleaning of components and switchgear with dry ice blasting systems. This removes all surface contamination and adhesions without abrasion.

Our staff will be happy to offer competent advice and assistance if you have any questions!

Control Systems from SPOHN + BURKHARDT - Take a seat and enjoy! - www.spobu.de

To avoid extensive downtimes or idle periods, we have a large warehouse in Bremerhaven with a storage capacity of around 600 square metres for approx. 6,200 items. This ensures that we are ready to deliver at virtually any time and can supply you with the products you need. Our warehouse stocks various circuit breakers, contactors, relays, transformers as well as approx. 25,000 m of ship cables of different types.

Of course, a brochure cannot answer all your questions. Therefore, please contact our customer care service.
