**WE BRING MOVEMENT  
INTO YOUR LIFE!**

## Your partner for freight forwarding and logistics services

Our family business has made a name for itself over many decades as an experienced and trustworthy food supplier - especially when it comes to the delivery of sugar. Our service concept is based on detailed individual advice and cooperation in a spirit of partnership. As a customer, you benefit from our expertise and in-depth knowledge of the industry, as well as from the full-service packages tailored to your needs. The success within the group of companies is largely based on the people who carry it.

A team of around 110 highly trained and qualified employees - from flexible dispatchers to experienced professional drivers and enthusiastic trainees - takes care of your orders with motivation and personal commitment. Targeted further training, combined with the latest technology, keeps our knowledge up to date. We take personal responsibility and keep our promises - even in the context of unusual orders with time limits. Just get in touch with us!

### OUR TEAM HAS LOGISTICS IN ITS BLOOD

As a training company for freight forwarding and logistics services as well as professional drivers, we train the specialists of the future. Whether young or old: with us you benefit from the experience of a dynamic and motivated team of employees. We promote a high level of knowledge among our employees through targeted further training - using the latest technology. In addition to driver training in accordance with the BKrFQG, we also provide training on economy and ecology as well as load securing. Driver safety training is just as much a matter of course for us as training our employees in how to handle our customers' products and processes.

### Full speed ahead into the future

We use our resources responsibly and actively contribute to environmental protection. Whether it's our vehicle fleet, delivery routes, employees or customers: Sustainability and responsible action are top priorities for us in all areas of the company! Over 170 vehicle units for tarpaulin, silo, tank and special trailers are on the road for you. Equipped with the latest, extremely quiet compressors with sound insulation, they ensure low-noise unloading without pollutant emissions. Of course, we also have power generators on the silo trailers to ensure low-noise, CO<sub>2</sub>-neutral unloading. 10 working machines (excavator, wheel loader, caterpillar) round off the versatile spectrum.

FULL-SERVICE ...

## Portfolio for complete shipping logistics

Our full-service portfolio for handling your products includes the complete shipping logistics. This includes, among other things, the complete control of your goods and communication flows for all processes and interfaces. We are your reliable contact when it comes to optimising multi-stage and networked processes. Our focus is on absolute transparency. Not least because of this, we can be reached by you at any time via a modern telephone system.

In the silo transport segment for food products, the highest level of purity is the first priority in every phase of the transport chain. As a full-service logistics provider, we can offer you comprehensive solutions that guarantee optimum quality and safety, even for highly sensitive goods. In this way, you have a certified guarantee of optimum transport and storage quality in every phase of your logistics processes. Entrust your goods to us and do not compromise on the purity of your goods. Our diverse spectrum is supplemented by the area of warehouse logistics (bulk goods) as well as its transport in tipping troughs and the field of earthmoving.

DISPATCHED WITH SECURITY ...

## Our state-of-the-art fleet

From receipt of goods to delivery, you can rest assured that your goods are in safe hands. The professional transport and removal of your goods in various containers, professional interim storage and decanting into the container form of your choice round off our range of services. Of course, we always choose the best shipping method and free routes so that your consignments arrive at their destination on time. You can flexibly decide whether you

want to use individual services from our range of services or our complete solutions.

Our ultra-modern and flexible fleet consists of 82 units. Equipped with all-wheel drive for use in difficult ground conditions as well as the latest technology standards, we can guarantee safe, punctual and environmentally friendly transport of your goods.

# KURT KÖNIG

Die Spedition Sewert und uns verbindet der Wille, alles für Kundinnen und Kunden zu geben. Sewert in der Logistik, wir bei Baumaschinen und Baugeräten.

## That's what sets us apart!

Each of our vehicles is equipped to the latest standards, such as EURO6, sound-insulated compressors on the tractors and state-of-the-art telecommunications/navigation. The equipment complies in all points with the current European guidelines for food hygiene and the food transport regulation. All vehicles are filled with H1 oil in the hydraulic circuit.

As an innovative forwarding company, we have equipped the majority of our fleet with an emergency braking

system. In addition to the safety of our employees, the integrity of the goods is of course our top priority. To ensure seamless transport monitoring, our fleet is equipped with modern, satellite-guided telematics. Traceability of the goods is not a foreign word for us, but lived practice. This includes being informed at all times about the status of the consignment entrusted to us.
