**WE DELIVER THE CORE  
OF YOUR SAFETY**

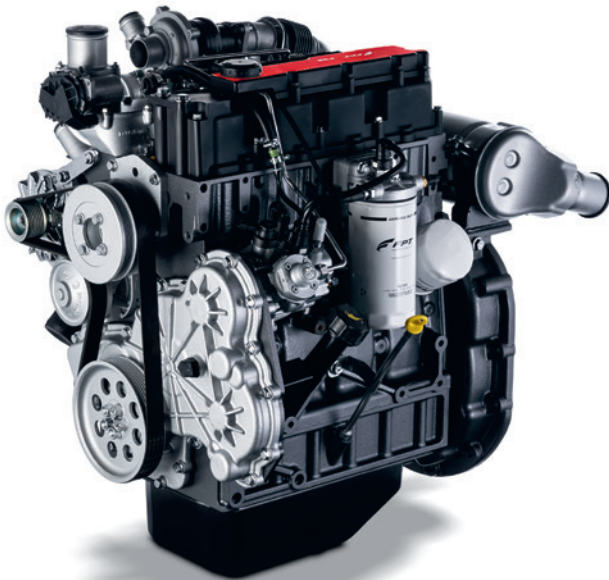

# ENSURING YOUR SAFETY – FOR OVER 50 YEARS!

We are the most competent solutions provider in the field of industrial engines in Germany and Austria. Since 1967, we have been delivering powerful, reliable drive units that ensure hospitals operate without interruption, livestock receives their feed, goods don't spoil, outbreaks of fires are extinguished at outset, work can continue on construction sites, and ships arrive safely.

We offer customised solutions, from CO<sub>2</sub>-neutral drive engines to the latest emission standard diesel engines. Our highly qualified, competent team works every day to find individual solutions for your drive technology needs, accompanying you throughout the entire product lifecycle of our high-quality products.

# ***AUTHORISED DEALER FOR FPT INDUSTRIAL IN GERMANY AND AUSTRIA***

More information at  
[www.fptindustrial.com](http://www.fptindustrial.com)

### ***OFF ROAD: AGRICULTURE, CONSTRUCTION, DRIVE UNITS***

Our engines are at the forefront of technology. Depending on the application requirements, variable geometry turbochargers, two-stage turbochargers, high-pressure common rail injection, patented exhaust after-treatment systems, and more can be applied. These engines not only respect the environment but also offer higher efficiency and reduced maintenance needs.

### ***POWER GENERATION***

Reliable power supply is crucial for households, businesses, and communities, while optimising energy efficiency and consumption is equally important. Our power generation portfolio includes sustainable, reliable, and efficient engines that cover a wide range of end applications even in challenging conditions.

### ***ON ROAD: VANS, TRUCKS, BUSES***

Our range of models for „on-road vehicles“ is based on three engine families (F1, NEF, and CURSOR) with displacements ranging from 2.3 to 12.9 litres, power ratings from 97 to 570 horse power, and maximum torque ranges from 240 to 2,500 Nm. All families also include natural gas engines.

### ***MARINE: COMMERCIAL AND SPORTS SECTOR***

Leveraging over a century of experience with high-performance diesel engines and ship operations, FPT Industrial offers a complete series of products characterised by high quality, outstanding features, and wide application versatility – ensuring maximum performance and efficiency even in the roughest seas. Our range of engines and equipment for the commercial sector stands out for competence and sustainability. Our goal is to increase performance, such as propulsion and propeller performance, while limiting emissions.
