WITH PROFILE

TYROO GMBH

YOUR TYRE AND RIM WHOLESALER IN THE HEART OF EUROPE

We are a future-oriented, owner-managed, international tyre wholesaler with the aim of satisfying the wishes of our customers and the challenges of the market swiftly and without complications.

In our warehouse stockholding, we have a continuous, above-average range of products in the areas of tyres, rims and accessories.

Important facts:

The Tyroo GmbH with Stefan Kratoziel, Holger Krieg and Tobias Fink became active on 1 July 2020 and developed into an established international tyre wholesale company. Countless quality tyres from many renowned sales partners are warehoused in order to be in a position to provide our customers with a wide range of products at all times.

Our top priority are specialist expertise in all areas relating to wheels, as well as the efficient, rapid processing and handling of your orders.

We are constantly developing corresponding car, truck, TPMS (Tyre Pressure Monitoring System) and 2-wheel configurators due to the ever-increasing complexity. These can be used through our online shop.

As a high-performance full-range supplier, Tyroo GmbH will be happy to provide you with comprehensive advice.

NUMBERS, FIGURES, FACTS

OUR LOCATION

The area of the site at the central location in Neuhof is 85,000 m². There are 7 warehouses with 35,000 m² of storage space and 2 office buildings on the site. The storage area was expanded by 10,000 m² for truck tyres in 2020.

OUR TEAM

Our team:

We work hand in hand between the order acceptance department, customer service, the IT department, the complaints department, the accounts department and our warehouse managers.

Our company values:

We are constantly evolving to make our customers' lives easier. Continuous training for the team where the customer benefits from it.

Working atmosphere:

There is a positive working atmosphere in our company. Characterized by team spirit, openness and mutual support.

- *Combinations to match motorbike*

RIMS - COMPLETE WHEEL - TPMS

- *Does the selected rim also fit the vehicle*
- *When you need accessories*
- *Do you need TPMS - if so, which?*

STORAGE AND RETRIEVAL PROCESSES

Every day, a large number of products reach us in the goods receiving department. This applies to various groups of goods. At the same time, we take care of the consignment of the daily incoming customer or-

ders (until 17:00). For this purpose, we use high-lift order pickers and forklifts. Not only do we always give our best in storage and retrieval processes, we also use the latest technology for fast and error-free deliveries.

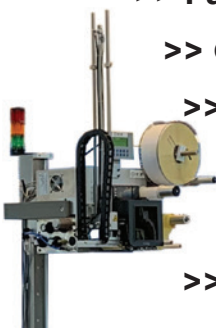

PACKAGING

We attach great importance to optimised space-saving packaging. For this, the shipment check by scanning the individual items plays an essential role. In some cases, the tyres are repacked in cardboard boxes to ensure safe transport. The finished tyre packages pass through the shrink tunnel and are shrink-wrapped all around with foil.

SORTING SYSTEM WITH POSTCODE SORTING

In our control centre of the sorting system, we recognise directly if the system has a problem at any point. This means we can react quickly and rectify the problem as quickly as possible for a smooth process.

Our sorting plant has an integrated volume measuring frame and an overflow scale built in. The advantage gained from this is that the parcel dimensions and weights are directly available in the system and receive a scan that the parcel has been handed over to the parcel service provider. The system also recognises the post-

code on the basis of the scan, so we can hand over the parcels to the parcel service directly after sorting the postcode and thus shorten the delivery time. Another advantage is that we can load various DPD bridges directly into the respective countries and ensure fast delivery to Germany, Italy, Belgium, Luxembourg, Austria, the Netherlands and France. We deliver with the parcel service DPD and GLS. Orders placed by 17:00 will be shipped on the same day.

CAR TYRES

As a full-range supplier, we stock tyres from all the world's renowned manufacturers. We offer great variety on 30,000 m² of warehouse space with a storage capacity of about 800,000 consumer tyres. In the consumer tyre segment, we offer car, SUV/off-road and truck tyres for every application and weather condition. Our trained sales team will be happy to help you with any tyre-related questions by phone or e-mail. With our professional search in our online shop, you are guaranteed to find the right tyre for your vehicle, suitable for every size and for every season.

THE FALKEN BRAND

The Falken brand was established in 1983 in its home country of Japan, initially as a flagship brand of high-performance radial tyres. Its founders deliberately chose a name that expresses dynamism, performance and natural elegance. Now, four decades later, Falken is a high-profile independent brand focusing on quality products, and continuously drives progress by using professional motorsports as a development and testing arena.

TRUCK TYRES

We stock all major and well-known truck tyre manufacturers. On a storage area of 10,000 m² up to 40,000 truck tyres are stored. Our range covers the various sectors such as local and long-distance transport, construction site, as well as city buses and coaches.

We offer exclusive distribution of the ERACLE brand in the truck sector. We are also happy to advise you by telephone.

You can get the perfect overview of all suitable tyres via our truck configurator in the online shop, where you can order around the clock. We stock truck, construction site and bus tyres in all sizes and for all axles. Choose between summer and winter tyres to keep you and your fleet safe on the roads all year round.

Your orders will be dispatched on the same working day by 16:30. We are happy to provide express delivery on request.

FROM PROFESSIONALS FOR SPECIALISTS

A PASSION FOR TYRES - SINCE 1946

For us, "Made in Germany" is not just an advertising promise, but is throughout part of our corporate culture. As a traditional company, we have been producing cross ply tyres for two-wheelers for more than 70 years. Over 550 different models are manufactured in our tyre factory with a high level of craftsmanship so that everyone can find the right tyre.

BRANDS IN OUR PORTFOLIO

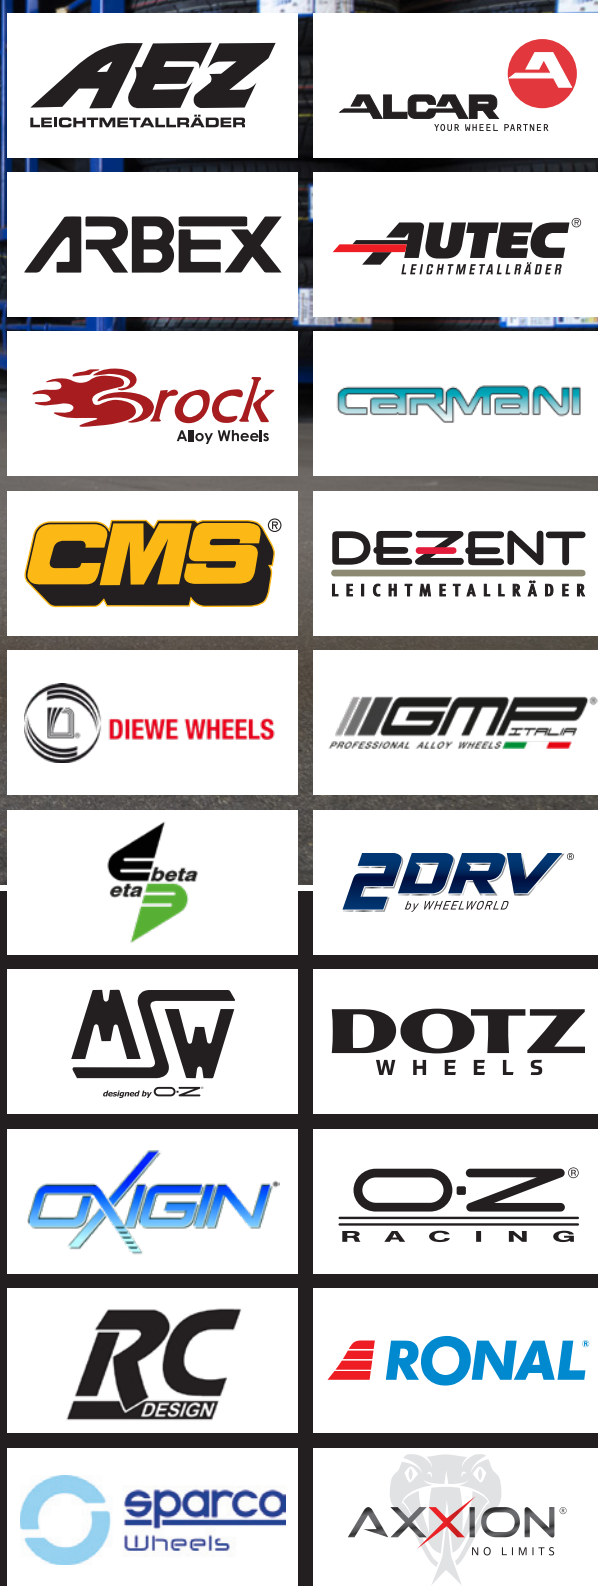

RIMS AND TPMS

Aluminium and steel rims, complete wheels and tyre pressure monitoring systems

Our competent employees offer you help with everything to do with wheels and tyres. With us you have the possibility to find the right product for your customer easily and quickly. Our rims are stored on a storage area of 2,000 m² and an additional outdoor area of approx. 3,000m².

We especially recommend our own brand Arbex - made by OXIGIN.

In addition to our huge range of tyres, we carry aluminium and steel rims from selected manufacturers and can therefore supply you with an extensive selection at fair prices. You can of course also order complete wheels from us and save time. You also have the option of ordering complete wheels with vehicle-specific tyre pressure monitoring sensors. Our own TPMS configurator is a highlight here.

TPMS

What does TPMS mean?

TPMS = Tyre Pressure Monitoring System

The sensors monitor the air pressure while the car is in motion. The sensor immediately reports to the cockpit if the pressure deviates from the pre-setting. Accidents can be reduced in the event of an extreme loss of pressure by the sensor's message. The air pressure can be corrected regularly by permanently monitoring the air pressure. This has a positive effect on fuel consumption.

Tyroo has a wide range of OE replacement sensors and universal sensors. Another advantage is that TPMS sensors can be replaced easily and quickly. We also have a large vehicle coverage. Various rubber and metal valves (silver, black, grey, bronze) are also part of our versatile range. You will find the matching TPMS kit assignment in our shop.

IMPORT AND EXPORT

AEO certification

Tyroo GmbH has held the status of authorised economic operator since January 2023. Also known as AEO certified. (AEO = means authorised economic operator)

Advantages of the AEO authorisation:

- You are considered reliable and trustworthy by customs.
- Fewer document checks are carried out during customs clearance.
- Fewer customs inspections are carried out.
- You receive simplified customs declarations and transit procedures.

Benefits of the certified exporter: (Export)

- Presentation can take place outside the customs office, e.g. on the exporter's own premises.
- No waiting periods for presentation.
- Usually there are no controls.
- Processing is digital and takes only a few minutes.

Advantages of the authorised consignee: (Import)

- The goods can be received directly in our company.
- The presentation, i.e. the obligation to present the goods at the customs office of destination, does not apply.
- The responsible customs office is informed electronically about the arrival of the goods.

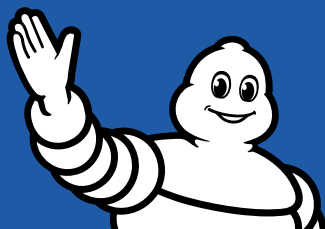

Our trained staff can ensure smooth export and import processing.

In our export offers, we take into account the agreed Incoterms and are available to advise our customers. Please do not hesitate to contact us:
