AWK Verschlüsse GmbH & Co. KG
Competence prevails

AN ALL OVER **GOOD DECISION!**

We have been specialising in the production of high-quality aluminium closures made of special deep-drawing aluminium in accordance with DIN EN 541 since 1989. All our products are made of 100 % environmentally friendly material. We have extensive technical know-how, state-of-the-art production facilities, and large storage capacities, so that we can respond quickly and flexibly to the requirements and wishes of our customers. This makes us your perfect choice for both large and small production batches. We count market-leading, established businesses among our customers as much as start-up companies.

Having been an industry specialist for many years, we are very well versed in the specific requirements of beverage bottlers. This means that we can give you the best advice. We produce closures with a variety of transparent and body colours as well as countless printed variations.

Our dynamic business development rests on the pillars of quality, flexibility, innovation, and service. Being an SME, we attach great importance to long-term customer retention and cooperative partnerships.

Durch die **GoZee-App** wird Ihre Broschüre lebendig

GoZee: Wie man in 30 Sekunden loslegen kann

1. Geben Sie im App Store oder in Google Play „GoZee“ in das Suchfeld ein und laden Sie die App auf Ihr Smartphone oder Tablet herunter.
2. Öffnen Sie die App und verwenden Sie sie auf Seiten mit dem GoZee-Symbol.

GoZee: Get started in 30 seconds

1. Go to App Store or Google Play, enter “GoZee” in the search field and download the app to your smartphone or tablet.
2. Open the app and use it on pages with the GoZee icon.

A WIDE VARIETY OF PRODUCTS

Gas-tight (GD) aluminium closures are key component of our wide product range. This type of closure is perfectly suited for mineral water, lemonades, beer, wine, champagne, milk, and milk shakes. In terms of transparent and body colours as well as print motifs, we are always glad to implement our customers' very own wishes and instructions. We produce closures containing PVC or PVC-free closures or closures with a locking ring as well as five-fold or six-fold perpendicular indentation.

Our Topvent closures are particularly well suited for non-carbonated and carbonated fruit juices. These are ventilating aluminium closures that can be used in both hot fillings and cold fillings, and also for heat exchangers, and pasteurisation.

PP closures with EPE cap seals made of polyethylene foam as well as special designs with PVC seals for hot fillings, pasteurisation, and drinks containing CO2 with compound. These closures can be produced to feature a locking ring or perpendicular indentation. In addition to this, special productions such as perpendicular perforation for returnable bottles or special closures with a spout can be made.

WE DO NOT COMPROMISE ON **QUALITY**

*Continuous quality control
with high-speed cameras*

Given that we as a long-standing industry partner know just how crucial meeting the highest quality standards is for our customers, we have been working in accordance with the ISO 9001 DIN standard for 20 years. This entails, among other things, quality checks at our own test laboratory as well as using top-notch materials. We carry out sensory testing to ensure that the quality of flavour of the products is preserved for our customers, and we continuously examine our production process. Among others, cameras checking our closures for cleanliness, roundness, and other relevant parameters are a permanent feature in this. This way, our customers may rest assured that all the closures that we deliver meet the highest quality standards.

The AWK team is made up of qualified and regularly trained specialists with the latest know-how and the latest industry knowledge.

Being the market leader for milk closure, we work with a specialised partner for the paint required to resist high levels of temperature stress.

The issue of environmental protection and the protection of natural resources is gaining ever more importance. It is for this reason that we have initiated comprehensive environmental and energy management. For the future for our environment!

CUSTOMER-ORIENTED SERVICE

In quality assurance, we assist you on location with aspects such as screwing and unscrewing tests of the closures, tightness checks and more. Be it over the phone or in person on location: We are glad to assist you!

From skilled consultation to punctual delivery, we offer our customers a comprehensive service package. This includes technical support in the maintenance of closure technology on location and more. The well-trained AWK service technicians work across Germany for our customers. When it comes to switching from GD closures to Topvent closures, for example, we assist our customers with our know-how.

Short delivery times are always guaranteed with us, given that we have state-of-the-art high-capacity warehouses allowing us to deliver quickly as and when needed. This helps minimise delays in the production process of our customers.
