

Delphi *organic*[®]

We are the bio experts!

Equipped with a wealth of industry experience, the initiators and shareholders of Delphi Organic have contributed significantly to the company's success with their individual skills.

Delphi Organic – that's us

Our company was founded in 2003 as an innovative start-up - the beginning of a success story based on sustainability, originality and a sense of social and ecological responsibility. Due to our personnel background, we have decades of experience in importing and distributing natural and controlled organic food and raw materials worldwide. In addition to our headquarters in Münster, we have another branch in Hamburg, which, with its location near the port, represents a strategically important trading and storage location.

Appreciation for people and nature is an integral part of our DNA and determines our daily thoughts and actions. Probably the most important component of our success is our dedicated team - a multicultural and ever-growing workforce that is ideally placed to understand better the different cultures and ways of life in our target markets. Furthermore, we employ freelancers in some countries of origin, such as China, Mexico, Peru or the Philippines, which have already resulted in some valuable cooperations and new partnerships.

Quality assurance – certified and audited

As comprehensively certified organic specialists with decades of experience, we guarantee the greatest care in product selection and gentle processing of plant-based raw materials - for a pure and high-quality product.

After initial quality checks in the country of origin by our trustworthy employees, the goods undergo further tests in accredited laboratories in accordance with the applicable EU organic guidelines after shipment in Germany.

Our own Quality Assurance department at our location in Hamburg checks and analyzes the products to ensure they are of impeccable quality while adhering to the highest possible standards for organically certified products.

When it comes to organic quality, we leave nothing to chance. Because Delphi Organic stands for products of the highest quality - extensively analysed and tested. You have our word on that.

Chickpeas

Lentils

Sultanas

Almonds

Hazelnuts

Coconut products

The Naturland standards for organic food are more stringent than the EU organic regulation and take particular account of social conditions in the production and processing of the products.

Naturland – ecological, social, sustainable

Our producers in the countries of origin, who are certified according to Naturland, guarantee the highest product quality in compliance with Naturland's strict association standards.

We are proud of our numerous and long-standing partnerships with producer groups and smallholder co-operatives around the world, through which we support organic farming and cover important aspects of sustainability. In this way, we create the greatest possible transparency - the basis for the trust that producers and processors place in us.

The organic growers' association Naturland was founded as early as 1982.

Today, around 140,000 farmers in 60 countries cultivate an area of more than 440,000 hectares according to Naturland's standards (as of 2022).

Our versatile organic range

Our range includes a wide selection of raw and processed organic products from all over the world. These include, for example, nuts, almonds and other seeds, cereals and pseudo-cereals, oils and fats, coconut products, oilseeds, pulses, sweeteners, dried fruits and many more.

Hand in hand – our partnerships

We have decades of partnerships with suppliers around the world - all of them producers and farmers certified according to European organic standards. Our products are imported directly from the respective country of origin, which means that our supply chain can be fully traced.

We maintain personal contact and regularly visit our suppliers on-site - such as in the project in Peru visible here. In addition, we support and supervise projects, some of which we initiated ourselves, e.g. in Kenya, Paraguay or Vietnam.

In doing so, we are committed to the principles of social justice through security for the supplier. Regular internal and external audits complete the transparency of our partnership-based sources of supply.

Our goal is to be able to offer the best quality in compliance with ecological and social conditions. We attach great importance to fair dealings with our suppliers. In this way, we make our contribution to organic farming, which covers the aspects of sustainability.

Food Safety with nuTIQ

Integrated Digital Solutions
nutritional quality in the entire
food supply chain

Testing – Inspection – Quality

We combine traditional tools for food safety like food testing, audits and inspection services with modern digital tools to provide data based risk assessment. Learn more about essential controls and preventive measures to ensure hygiene in production and in handling food from the **nuTIQ experts** and test the integrity of your products in terms of contaminants or residues in one of our **24 laboratories**.

Brillant kombiniert – Fall gelöst!

Bakterien und Viren sind äußerst geschickt darin, vielfältige Probleme in Lebensmitteln zu verursachen.

Wir bei LADR kombinieren detektivisches Gespür nicht nur mit Robert Kochs Methoden, sondern auch mit modernster Technik und Expertise.

Neben Bakterien, Hefen und Schimmelpilzen kommen wir selbst Noroviren, Hepatitis-A- und -E-Viren schnell auf die Spur.

Akkreditierte Lebensmittelanalytik:

- Umfassendes Analysespektrum
- PCR-Schnellanalytik
- Identifizierungen von Mikroorganismen
- Nachweise bakterieller Toxine
- Übersichtliche Richt- und Warnwerte
- Authentizitätsprüfung mittels NGS
- Schnelle und kommentierte Ergebnisse
- Online-Zugang zu Ihren Ergebnissen
- Eigener Laborkurierdienst

Service macht den Unterschied

- Sie erreichen uns notfalls rund um die Uhr.
- Kostenlose Abholung der Proben durch unseren eigenen Kurierdienst.
- Prüfberichte, auch Teilbefunde online per Sofortabfrage.
- Hilfe vor Ort.

Einfach **04152 803-268** anrufen.
Wir sind **24/7** erreichbar
und beraten Sie gern.
