Learning for Life

Ulm's Friedrich List School is a modern school with economic and commercial focus, providing its students not only with excellent technical knowledge, but also with important basics for independent and responsible living. Being a future-oriented educational institution, we impart practical knowledge to our students, which can immediately be implemented in their professional life and provides excellent opportunities for a successful future.

For a Successful Future

Individuality is an important aspect of lessons at our school. We take the personal learning needs and preconditions of our students into account, seeing as we are in a perpetual learning process ourselves. We aspire to continuously improve the quality of our performance and fully utilise each aspect of our potential.

More than a Vocational School

The Friedrich List School is a classic vocational school with a varied educational programme at its core. In addition to the Commercial Vocational School, the FLS offers a Technical College, Vocational College and Commercial High School. Apart from the size of our school, comprising 3,000 students, 165 teachers and 135 classes, this also manifests itself in a complex range of knowledge in all economic and general subjects.

OUR PRINCIPLES.

Challenging. Human. Practical.

Our school's three-word-credo perfectly summarises our core principles. We permanently challenge ourselves as well as our students. Both our teaching methods and our contents are praxisoriented. As vocational school with commercial profile, we convey vocationally-oriented knowledge as well as practical skills and place emphasis on tolerance, open-mindedness and a sense of responsibility.

Lessons and Learning

We do not only prepare our students for their professional and academic future, but also for a socially successful life with responsibility in all professional and personal aspects. With our support, they learn to discover, capitalise on and develop their own potentials.

Communication and Cooperation

Our communication rests on mutual appreciation, respectful interactions and personal exchanges. We strive for a smooth flow of information and a high level of awareness of all parties.

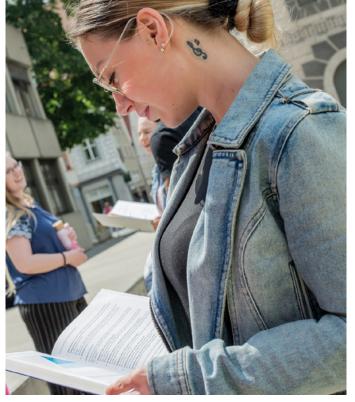

Place of Learning and Working

A pleasant learning and working environment is the ideal stepping stone for successful learning. To provide this, we undertake to make everybody feel welcome at our school, thus strengthening our sense of community and identification with the school.

Publicity

We want to make the public aware of our extensive educational offerings, the high standard of learning and our varied school activities. With their way of teaching and their behaviour, everybody involved with the school contributes to our positive public perception.

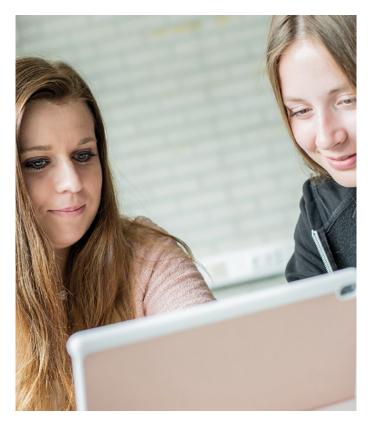

TYPES OF SCHOOLS AND DEGREES.

Commercial Vocational School (CVS)

The Commercial Vocational School is the largest school type at the Friedrich List School Ulm. Currently, around 1,800 students out of a total of approx. 3,000 students attend the CVS.

Partnering up with training organisations, trainees can normally complete their leaving examination at the CVS after 3 years. In addition to subject-specific theory and general knowledge in the fields of economics and administration, students also acquire key skills such as methodical, behavioural and social competences.

Vocational training is offered for e.g.:

Wholesale/retail merchant | Salesman/ -woman
Assistant tax consultant | Industrial clerk |
IT-systems clerk | Office management clerk | Insurance/bank clerk
| Legal assistant etc.

We provide attractive training offers with additional qualifications for high school graduates:

Financial assistant (bank or insurance), industrial clerks (assistant for international business management with foreign languages.)

Vocational Business School

The two-year Vocational Business School programme provides graduates of general schools with an opportunity to acquire their entrance qualification for technical colleges, corresponding to an intermediate school-leaving certificate.

Training Company

In the vocational school's training company, students can apply their acquired theoretical knowledge in a practical office environment. Customer orders are processed, orders are placed with suppliers, invoices are booked and customer contact is practised under realistic conditions.

Die SWU versorgt täglich über 200.000 Kunden mit Strom, Erdgas, Trinkwasser, Wärme, Telekommunikation und betreibt den öffentlichen Stadtverkehr. Mit vielen Aufgabenfeldern bieten wir als Ausbildungsbetrieb für rund 50 Auszubildende eine sehr vielseitige und abwechslungsreiche Ausbildung.

Ausbildungsberufe

- Industriekaufmann (m/w/d)
- Kaufmann für Büromanagement (m/w/d)
- Informatikkaufmann (m/w/d)

Duale Studiengänge

- Bachelor of Arts (m/w/d)
 Studiengang Industrie an der DHBW
- Bachelor of Engineering (m/w/d)
 Studiengang Energiewirtschaft an der DHBW

TYPES OF SCHOOLS AND DEGREES.

Vocational College I

The Commercial Vocational College I offers a full-time programme, comprising one year and building upon the intermediate school-leaving certificate. It intends to provide basic theoretical and practical subject-specific knowledge for commercial and administrative professions as well as deepening general knowledge.

Completion of the Commercial Vocational College I facilitates entry into vocational training professions (e.g. bank clerk, industrial clerk, wholesale/retail merchant, assistant tax consultant) and also shortens the training period in some cases.

Vocational College II

The Vocational College II provides high-achieving students with an opportunity to acquire the subject-linked higher education entrance qualification. The Vocational College II is also a one-year full-time programme.

The VC II prepares students for commercial professions in business and administration by providing in-depth subject-specific theoretical and practical knowledge. The degree State Certified Commercial Assistant can be acquired upon completion of an additional examination.

However, the biggest advantage is the acquisition of the subjectlinked higher education entrance qualification, which entitles its holders to study at higher education institutions.

Training Company

In the vocational college's training company, students can apply their acquired theoretical knowledge in a practical office environment. Customer orders are processed, orders are placed with suppliers, invoices are booked and customer contact is practised under realistic conditions.

Commercial High School

With three-year and six-year programmes at its Commercial High School, the Friedrich List School paves the way for university studies or an immediate career start. The profiles General Economics, Finance Management and International Economics provide individually customisable opportunities in the national and international professional world.

With corresponding offers, our profile International Economics is geared towards the increasing internationalisation and globalisation of economics and society. Business and negotiation fluency in English is focused on during our lessons. Macro- and microeconomics are taught bilingually.

Students with the profile Finance Management are also diligently prepared for the challenges of global economics and acquire extensive fiscal knowledge.

The six-year programme at the Commercial High School starts in grade 8 and ends after a total of 13 school years with the acquisition of the general higher education entrance qualification.

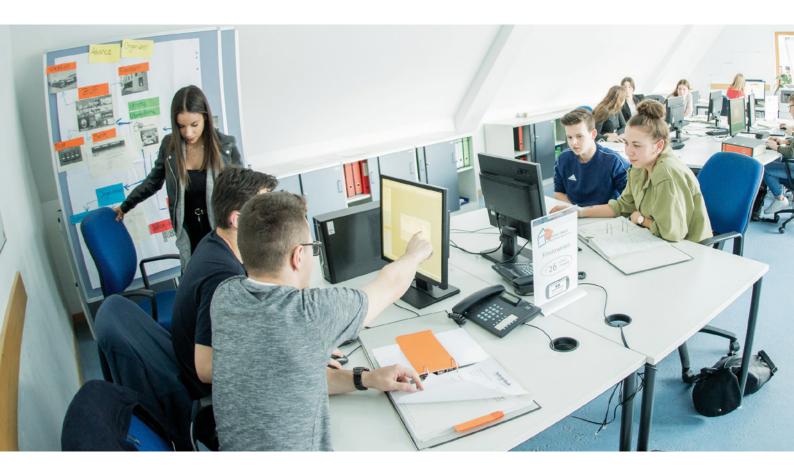

Wenn man den richtigen Ausbildungspartner an seiner Seite hat.

LEARNING AND LIVING.

What we value at the FLS

Developing Competences

In addition to conveying commercial expertise, we also strive to promote competences. Such competences are for example promoted through business games at the various school types, the project week at the Vocational Business School, prevention days, and the tablet project of the Commercial Vocational Schools. In addition, the FLS agenda group supplements lessons with ecological, economic, social and sustainable topics.

Individual Support of Students

We can individually support all talents with our biology study group NUGI (Network University-High School-Industry), supplemental lessons at the vocational college (business assistant) and math plus. Further offers for individual promotion are the LIST learning network with tutoring by students for students, individual support (INDUS), individual promotion (INDIF) and language support classes for migrants.

Impairments are no handicap

At the FLS, we take special care of handicapped students. Our special needs teacher is specifically tasked with inclusion and coordinates the provision of compensation for disadvantages. All our rooms are accessible barrier-free. Furthermore, our school supports practical placements by coaching the participating training facilities.

Participation in Certifications

The FLS regularly provides its students with the opportunity to participate in external certifications, such as the CISCO certificate or the computer driving license ECDL. The "KMK Certificate" certifies students to have extensive work-related English skills.

Diverse Activities

We promote acquisition of extracurricular skills with our varied offering of activities, including welcome days for new students, study tours, project days, ski trips, orientation days, school trips, factory tours, internships, school choir, school band, etc.

We are an EU Ambassador School

The Friedrich List School is southern Germany's first certified EU Ambassador School.

This fills us with pride and is motivation enough to promote the European Idea at our school. Being a commercial school, we know particularly well, how important liberal values, democracy, the free European single market, understanding among people and peace within Europe are and stand up for such values.

As EU Junior Ambassadors, a team of our students organises projects and events, thus promoting European issues at our school. Our EU ambassadors are guided by their credo: We accept and show responsibility.

VEED – Vivre l'école et l'entreprise différemment

Strategic school partnerships are integral to the internationally oriented education programme of the FLS. We recently struck up new partnerships with the Lycée La Martinière Duchère in Lyon and the Lycée Frédéric Chopin in Nancy. We can now proudly offer this exchange programme to the students at our vocational school.

Zahnärzte vertrauen uns. Wir vertrauen auf die Fähigkeiten unserer Mitarbeitenden.

EU PROJECTS.

NETINVET

This pan-European project connects schools, training companies and training facilities in 13 European countries. VET means "vocational and educational training" and promotes Germany's dual training system at vocational schools throughout Europe. Furthermore, students of the vocational school with an interest in NETINVET have the opportunity to participate in European vocational exchange programmes. Students interested in multi-week stays abroad are invited to contact us and will

then complete an internship at a training company abroad. There, they will attend school, get to know the education system and learn more about the country, its people and its culture. Such stays abroad are supported by the European Union's funding programmes, in particular Erasmus+.

E+motion

Since its inception in October 2018, the school choir project E+motion has been a great success. Its participants comprise 100 students from five European countries, who visit each other in their respective home countries. A joint interest in making music opens doors to meet young people from all over Europe.
