FOREWORD

Dear Readers,

We are happy to present to you our range of services for containers and logistics in this brochure. As a family-owned company in the third generation, we have continued to develop and have the experience of more than eight decades – in an industry which is constantly developing.

We see ourselves as a partner of shipping companies, rail operators and forwarding agents in the combined transport, as well as in the conventional transport – convincing our customers with first-class transport performance and absolute reliability. Long-term Customer Relationships as a result of highest satisfaction are our target – and the secret of our enduring success.

Sincerely yours
Ferdinand Kloiber

CONVINCING LOGISTIC COMPETENCE

With reliable flexibility

With around 170 employees and an extremely powerful, extensive fleet, Kloiber GmbH offers you a complete range of services for every logistic requirement. As a specialist for combined transport, we provide depots at the central handling points in southern Germany for maximum efficiency and flexible reaction capacity. Whether oversea containers, trailers, swap bodies, tank or bulk containers – we master the handling of every transport medium and score points with speed, agility and low costs through our strategically optimized locations.

Logistics with quality

As a responsible and forward-thinking company, we work within the framework of the quality management certified according to DIN EN ISO 9001: 2008 to guarantee our performance permanently at the highest level – and to continually optimize it. In addition, we have all other certifications which are relevant in the logistics industry.

Historically

Today's Kloiber GmbH goes back to 1934, when Ferdinand Kloiber began to transport timber for sawmills. 30 years later the transport of mineral oils and the establishment of an independent gas station in Petershausen were added. Today, Ferdinand Kloiber, who has developed the company as the leading service provider for container logistics since 1985, is managing the third generation business.

SERVICE ALL AROUND

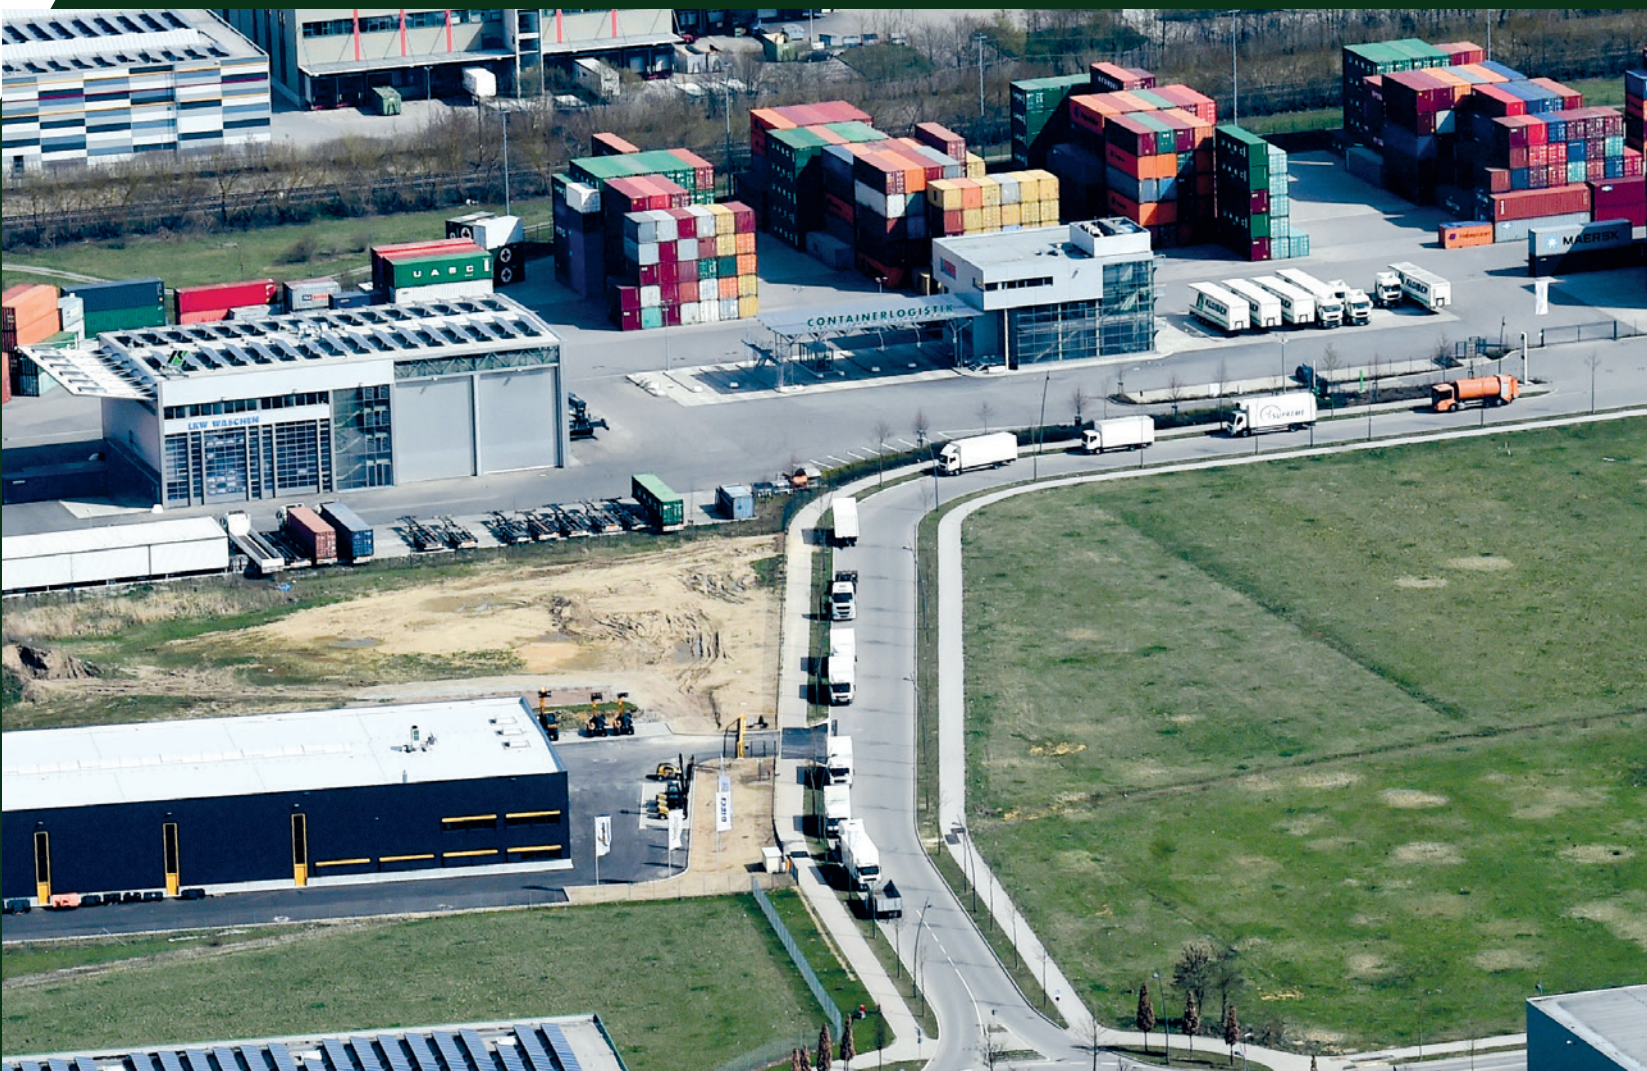

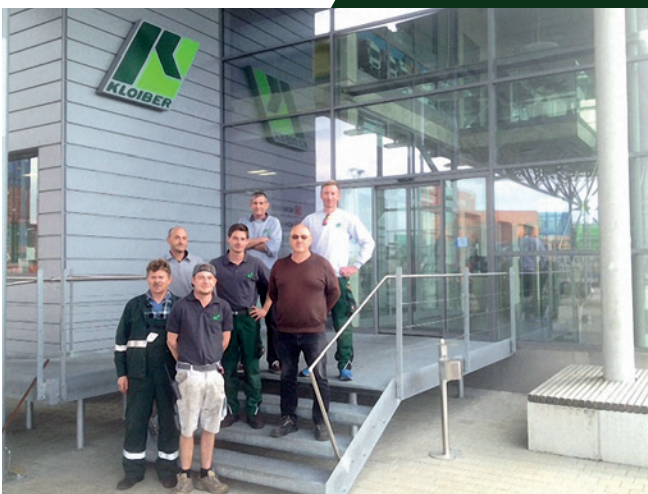

Strong teams for best transport performance

At all of our locations, our employees are taking care for you with personal commitment and best know-how. For your transport orders, you have a contact person, who is familiar with all the details and stands by your side as a partner. No matter what you want to move – we offer the ideal solution, based on transport quality and economy.

In an optimally working network, we combine all transport options – and use all of the synergy effects. We handle the complete order process for you, starting from the consultation and order acceptance over the creation of the freight documents, the disposition of the wagons, till the planning of corresponding depot space. You don't have to worry about anything while knowing at any time, that your valuable cargo is on the best way.

We are here for you

In addition to the headquarters of our administration in Petershausen, where we also maintain our fleet, we have several locations which are best positioned for transports. In Munich we are located in the Hofbräuallee directly at the train terminal with our most important depot with disposition and fleet. In the GVZ Augsburg we are there for you directly at the A8 with 40,000 m² storage area, fleet, workshop and team. In Nürnberg and Ulm we are present with a powerful own truck fleet. Everywhere in Bavaria we are located at all transshipment terminals, where railways meet the street.

Unsere Beratung kennt Ihren Standort, weil wir den gleichen haben.

Jeder Mensch hat etwas, das ihn antreibt.

Wir machen den Weg frei.

Willkommen bei der Genossenschaftlichen Beratung – der Finanzberatung, die erst zuhört und dann berät. Ganz gleich, welche Ziele und Wünsche, Pläne und Vorhaben Sie auch antreiben, wir beraten Sie gerne: ehrlich, kompetent und glaubwürdig. Transport competence

At all our locations you are welcomed by helpful and friendly employees who are best qualified and trained at regular intervals. As a forward-looking and responsible company we provide our transport competence to the next generation. The Klobner GmbH offers young and dedicated people the opportunity for high-quality training as agents for logistics, office clerks or professional truck drivers. In average we have seven trainees always looking forward to a successful graduation to appoint them as employees.

Professional drivers

Today, a professional driver is trained in complex apprenticeship which in addition to all driving skills and knowledge about freight and cargo teaches ecological and economic aspects. The drivers acquire a fuel efficient driving style by defensive and predictive driving on the road. Besides the reduction of freight costs there is a significantly lower frequency of accidents as a positive side effect, which we appreciate. To save the knowledge of the driver, after the apprenticeship, in a long term on top level regular trainings are held every five years by external coaches.

KALMAR

Kalmar bietet Frachtverladelösungen und Services für Häfen, Terminals, Distributionszentren und die Schwerindustrie.

DEPOT AND CONTAINER – CARGO AREA FOR EACH DIMENSION

Cargo and containers in best hands

Our experienced depot teams guarantee with conscientious care that your cargo and your containers will safely reach their destination. We are equipped with extensive equipment, containers in any size and modern depot software. Whether for the seaport-backcountry-traffic with intermediate storage or for transports, which need to be done quickly and smoothly – we make it happen for you.

Container maintenance included

Our complete service for container transport also includes the control of the containers for damage and cleanliness – with appropriate repair and cleaning measures. We measure on request the moisture content of the container floors and create a professional interim storage in our depots. Inlets for bulk or tank containers are installed as required and disposed after using, in a professional way.

Rent or buy?

You need additional container capacity in the short term or you want to expand your cargo volume in the long term? Kloiber GmbH offers you the right solution for every situation: We rent containers in good condition and sell you good used or even completely new containers at attractive conditions. Upon special request, we build containers in our certified workshop according to individual requirements.

**DIE STÄRKE
KOMMT VON UNS.
DIE RICHTUNG
GEBEN SIE VOR.**

Weil Ihr Unternehmen wie kein anderes ist, sind unsere Lift Trucks für jede Herausforderung gewappnet. Um Ihre individuellen Herausforderungen zu lösen, haben wir unser Portfolio noch effizienter, intelligenter und leistungsfähiger gestaltet.

Für alle Anforderungen und anspruchsvolle Umgebungen stehen Gabelstapler, Reach Stackler oder Containerstapler bereit. Effizienz ohne Kompromisse – in jedem Einsatzbereich, den Sie bestimmen.

Fertigteil-Montagegruben in Füllkammerbauweise

Einsatzfertig ab Werk

Nach diesem Leitsatz baut die Firma BALZER Montagegruben in Füllkammerbauweise. Dabei wird großer Wert auf die kundenorientierte Planung, Konstruktion und Ausstattung der Montagegruben gelegt, damit „am Ende“ alles am richtigen Platz ist. Ebenso gehört der Vertrieb und der Montageservice von Werkstattstechnik zum Aufgabenbereich.

Alles aus einer Hand!

Der Einbau kann ohne Betriebsunterbrechung vorgenommen werden. Schnelligkeit beim Einbau ist deshalb auch ein Hauptargument, das für den Einbau dieses Komplettproduktes spricht. BALZER als Full-Service Anbieter liefert Fertigteil-Montagegruben in Füllkammerbauweise als erster und einziger Hersteller einsatzfertig ausgestattet.

Nachhaltig - die Umweltgrube von BALZER

- Keine Pfützen durch abtropfendes Wasser im Hallenbodenbereich.
- Umweltschutz durch hermetisch integriertes Entsorgungssystem. Fremdstoff-Eindringung ins Erdreich wird umfänglich verhindert.
- Kein überhöhter Einbau erforderlich.
- Zulassungen: WHG / VAwS (AwSV) / TRwS (779/785/786), ArbSchG / BetrSichV / GefStV, einschließlich Brand- und Explosionsschutz, TRBS 2152 / TRGS / ArbStättRL, VdTÜV-MB 967, DGUV.
- Vom Deutschen Institut für Bautechnik (DIBt - Nr. Z-38.5-278) bauaufsichtlich zugelassen, bauartgeprüft und zertifiziert.

Comfortable handling capacity

We have enough capacity at each location as well as man and machine power for freight orders of any size. For example, our storage area in Munich offers 50,000 m² of space for containers with a total volume of up to 6,000 TEU. We operate this location with a 15-member team which receives around 500 orders per day. Office building, container and truck repair hall, washing area and covered container check-points offer optimal conditions on the completely asphalted surface for professional procedures.

Within our 40,000 m² Depot in Augsburg, we are moving around 175,000 units per year.

Container weighing according to SOLAS

For shipments in international maritime transport, we are authorized in Munich and Augsburg to weigh the Containers according to SOLAS – for smooth handling in the sea harbor.

POWERFUL VEHICLE FLEET

The perfect equipment for every requirement

Around 150 own trucks, including side-/vertical loaders, crane trucks and 300 chassis make us the largest logistics service provider in Bavaria. We handle all the transport details for you from the scheduling to the planning and control of the processes in combined transport up to customs clearance and track monitoring.

Besides our complete service in combined transport we are also your reliable partner for europe-wide road transports with container, plans or platform trailers. Here we also have approvals for 3 m oversize. We guarantee to find the best solution for every transport order.

Ecologically combined

As a specialist for combined cargo transport, we are focusing on the ecological benefits of this future-orientated transport model. This is because the primary transport of freight by rail relieves not only our roads but also our environment. We use rail for long distances and are highly flexible on short distances with our trucks. This approach does not only secure nationwide service quality, but also results in the efficient protection of finite resources.

With the average transport of 125,000 units per year, we are saving around 45 million Truck kilometers and 15 million liters of diesel fuel. The spatial proximity of our empty depots to the handling terminals, allows us to avoid empty journeys and to save resources. In addition, we use our logistics expertise at various additional levels to protect our Environment:

Fuel saving by driving technology and engine efficiency

As already mentioned on page 11, our drivers use advanced driving techniques to control the fuel consumption. In combination with our constantly updated fleet and accordingly efficient engines at Euro 5 and 6 level, we reduce consumption to the possible minimum.

Sustainable tire management

The use of retreadable tires for our fleet makes a significant contribution to conserve valuable raw materials. By ensuring a consistent tire management we do not only provide the lowest possible wear and an overall product lifetime extended by 4 times, but also further reduction in fuel consumption.

Save energy

In addition to the environmentally conscious thinking and acting in the vehicle fleet sector, we are also using environmentally friendly energy standards. With our own combined heat and power unit in our headquarters in Petershausen, we generate the energy for our plant. As an active contribution to the energy sector we cover the majority of our heat demand with combined cogeneration and solar thermal energy. With the operation of large-scale solar systems and the investment in wind turbines we are also committed to the promotion of environmentally friendly energy forms.

Always one step ahead

In the complex structure of combined cargo traffic we use exactly the variants and possibilities for each order, which optimally support our customers. In our mindset we are always a few hundred kilometers ahead of the respective Cargo and create ideal conditions for perfectly executed transport processes.

In combined transport we are involved with

- // Shipping lines of the North, West and South ports
- // all Bavarian terminals
- // own depots in Augsburg and Munich
- // a versatile special fleet for Container trucking in the run-up and after-run – especially in Bavaria, Austria and Italy
- // own vehicles in Munich, Augsburg, Ingolstadt, Nürnberg, Regensburg, Burghausen and Ulm

CONVENTIONAL FROM A TO B

Fastest connections all over Europe

With our competence resulting from combined transport we are also your strong partner in the conventional, local and long-distance transport. We have own trailers – from closed canvas trailers to the open platform – for every transport requirement the appropriate vehicle.

With a fleet of 80 megatrailers, we are a strong partner of the automotive sector.

We do all the tasks relevant to the respective transport for you and ensure that your cargo arrives at the desired destination at the right time and in the best condition. You have a contact person, who will advise you on all questions and who knows, thanks to modern telematics in our vehicles, at any time where your goods are located.

FUEL SERVICE FOR OUR CUSTOMERS

More than just refueling

At our petrol stations in Munich, Augsburg and Petershausen you can easily refuel your trucks by using a variety of fleet cards. We also offer a truck washing machine at all locations and the professional cleaning of your container.

READY FOR THE FUTURE

In the region for the region

As a successful company, we like to return and regularly engage us for different projects and clubs. For pupils and students we offer internships which are an exciting opportunity for gaining a lively impression of various facets about transport logistics.

Integration Day 2017

The Franziskuswerk Schönbrunn in cooperation with the city and district of Dachau organize the integration day as a sign for the rights of disabled people. We are looking forward to welcome in this context a resident of the Franciscan monastery for an internship with us.
