MEGAFLEX

... flexible in foam ...

MEGAFLEX Schaumstoff GmbH is a completely independent producer of polyurethane flexible foams with a family tradition of more than 50 years.

Our experience makes the difference. Ever since the founding of our family business more than 50 years ago, MEGAFLEX Schaumstoff GmbH as a specialist in producing and refining of high quality polyurethane flexible foams, makes it's footprint within Europe. Our midsize, in second generation led company structure grants a 100-per cent customer focus and allows us to act reliable, flexible and fast

on customer's requirements, as well as on custom made productions. Our different production lines, plus our state of the art production facility, which is presently the most modern foam production facility in the world, allow us to be able to produce about 45,000 tons of foam each year. Accordingly, we placed ourselves among the leading providers of foam in the European market.

Our infrastructure

We consider us to be the bridge builder who combines the well-tried with the innovative, to establish values that last. A solid know-how on the one side plus the modern input of state of the art technologies and production lines on the other side, grant an innovative qualitative product made in Germany with fair market prices.

This very high demand implies continuous investments in our company that employs about 350 local employees. Proudly, we have introduced the most modern and currently largest production line within Europe in July 2016. About 500m of new build premises allow us to react flexible, price- and time-efficient on market demands and short term customer requirements in terms of production, storing and manufacturing. Respectively this investment does not only secure a relevant market quantity, but more important it grants the outstanding MEGAFLEX-quality in polyurethane flexible foams and their further processing.

Upon completing the product, round about 30 own truck-unities enable a flexible and certainly clean transport to the customer. Your advantage: Our trucks transport on our own duty only, accordingly useless transport delays or any kind of soiling are eliminated. In addition to our Jumbo-trucks we also owe four unique press-trucks for our block-buying customers, in order to transport multiple more blocks at one time to be as time- and cost-efficient as possible.

Our success is multi-faceted!

Flexible, multifunctional, customer-oriented and fair - four aspects are certainly not enough to characterize MEGAFLEX Schaumstoff GmbH, the list of finalized projects and perfectly satisfied customers is way longer, but still these four aspects describe our special qualities quite well.

Flexible – Full customers trust shapes our company structure ever since. Accordingly, extremely fast reactions on customer requirements, very short transport times and customized production styles are our daily business – just like “flexible in foam”.

Multifunctional – foam in its variety. We are not only a foam producer, but we refine our foam with respect to your individual requirements. Multifunctional cutting processes allow every thinkable customer requirement, we offer further foam treatment from mattress-sleeves with diverging launching-zones up to fully covered, packed and ready for transport mattress, it is your choice!

Customer-orientation – anytime accessible, anytime applicable. Being a family-managed company we understand to be accessible for our clients at anytime, to be one of our most important duties. Understanding this, allows MEGAFLEX Schaumstoff GmbH to deliver masterly quality on an invariably reliable basis, day by day.

Fair – In respect with the published prices of raw materials in the market, we recalculate our prices for each product, each client on a monthly basis to secure a transparent-, up to date- and fair-price structure of our products. Promised!

Our company location in Guben in the so-called Lausitz-region connects us equally to eastern- and western parts of Europe and grants effective product-deliveries to each client within the radius of 1000 km.

Our products

Our Variety will inspire you!

We deliver what you require: High quality products for faire prices. A wide product range provides entire customer satisfaction of our demanding customers. No matter what product you decide on, highest quality- and performance-standards are granted!

Foam blocks – All qualities of our polyurethane flexible foams are also available as block, whereas height, width and length are determined by you. To reduce complex handling- and transport costs, MEGAFLEX Schaumstoff GmbH offers the opportunity to receive pressed foam blocks. Our foam portfolio offers:

- **PUR – polyurethane flexible foams**
- **HR – cold cure foams**
- **VS – viscoelastic foams**
- **HS – hypersoft foams**

Ready-made products – Our investment has not only taken the pure foam production to be state of the art. More than 25 cutting- and contouring-facilities allows us to produce each individual required cutaway-view. A diversity of different packing machines secure a clean and high quality product at the client.

Mattress fabrication – Since 2012 we also produce mattresses. We fabricate not only a high variety of custom-build covers for the different foam body, we also pack and label these according to our customers needs and delivery these to the determined destination. Good to know: MEGAFLEX Schaumstoff GmbH understands its mattress production only as an additional service feature for our customers, we do NOT do any kind of direct marketing.

Nonwoven fabrics & Cotton wool – Stagnancy is a loanword for us. In summer 2017 MEGAFLEX Schaumstoff GmbH will expand its portfolio with a quilt- and pillow production.
